

# STICKER & DECAL

## APPLICATION INSTRUCTIONS

### STEP 1

Make sure the surface is clean and dirt free as possible.

### STEP 2

Prepare the sticker for application by firmly rubbing a squeegee or credit card across the clear transfer tape.

Position your vinyl cut graphic (do not peel the graphic away yet).

Make sure you're happy with the position & use masking tape to hold in place.

### STEP 3

Peel away half of the vinyl from the backing sheet (shiny part)  
NOTE: The vinyl image will stay adhered to the application tape.

### STEP 4

Apply half of the vinyl decal to your surface.

Starting in the centre, apply pressure with a squeegee or credit card to force the air from beneath the vinyl decal.

Work your way from the middle to the outside edges of the application tape. (Be sure to apply pressure to all adhered parts of the graphic so far).

### STEP 5

With the remaining half of the vinyl graphic, repeat steps 2 & 3.

When the vinyl decal has all been fully adhered, apply pressure again the entire area.

Carefully peel away the application tape.

### TIPS

Use a pin/scaple blade to pop any bubbles that are still there after pressure has been applied.

If required you can place the removed (shiny carrier sheet) over the installed decal and apply more pressure over again.

Clean the installation surface with thoroughly with rubbing alcohol or soap and water  
Do not use household sprays to clean surfaces as the chemicals can leave a residue behind that will prevent the sticker from adhering.

For best results do not apply stickers and decals in extreme hot or cold temperatures.
